PERFECT E-BIKE.
PERFECT DAY.

We at Nox Cycles are manufacturers of high-tech e-bikes. We are driven by a passion to build the best electric mountain bikes around. Our guiding principle is to offer every customer top quality and individuality.

Nox hybrid e-mountain bikes take freedom and adventure to a whole new level.

OUR FACTORY

BERLIN-ZILLERTAL. THE BEST OF BOTH WORLDS.

The Nox Cycles brand was created in Berlin in 2004, based on our passion and ambition to produce competition-capable gravity bikes equipped with top-of-the-line components and assemblies.

Since the 2016 season, we have been focusing exclusively on developing and producing high-quality electric mountain bikes at our new production site in the heart of the Austrian Alps.

DESIGNED IN GERMANY.
MADE IN AUSTRIA.

FROM IDEA TO FINISHED BIKE – A LONG TRAIL

Many of Nox's ideas and improvements are conceived on the trail, while others result from the many years of experience of our employees, testers and team riders. We at Nox Cycles work hard each day to develop these ideas through to production and bring them back onto the trail. Each stage of this process – from product design, to prototype construction, to series production – must be given the same level of attention, as they all contribute to the bike's strong character and its resilience on the trail.

NEXT GENERATION

BUILDING THE SWEETEST HYBRID BIKE

The Nox Cycles team endeavoured – almost obsessively – to perfect every last detail when developing the new bike generation. Finite-element load analyses, optimised calculations for kinematics simulations, coordination of form and colour – nothing was left to chance, and everything was relentlessly tested on all trails until theory and practice were in perfect harmony. Practically no stone was left unturned – from the battery system, to geometry and styling, through to colouring and equipment lines.

THE RESULT:
the perfect e-bike.

XC Trail 27,5"+/29"
LONG AND LAID-BACK. 120mm/130mm

You enjoy long, laid-back rides on 29" tyres, but would you also like to ride technical trails with 27.5" wheels on the same bike? Then turn to page 13

All Mtn 5.9 27,5"+/29"
THROUGH THICK & THIN. 150mm/160mm

Looking for an e-mountain bike that's a true all-rounder and can accompany you on all your rides, be it your regular tour or an alpine crossing? Then turn to page 21

Enduro 7.1 27,5"+/29"
OVER ROUGH AND ROCK. 180mm

Do you like extreme, long rides on single trails and over rough terrain? Do you want to have fun riding both uphill and downhill? Then turn to page 29

TECH&DESIGN

HYBRID

As with its predecessor, the declared objective for the new Nox Hybrid e-mountain bike range was to equip the bikes to the highest standard and optimise them for climbs and, above all, descents in challenging terrain. All hardtail, All-Mountain and Enduro bikes are therefore supplied with a Brose electric drive, because we believe the symbiosis between muscle power and electric propulsion – the hybrid drive – is the future of mountain biking.

NOX R&D

NOX R&D

The Design department at Nox Cycles is responsible for continuously developing and perfecting our e-mountain bikes – from the frame geometry to the very last detail. Only when everything is absolutely consistent the next development step initiates: the prototype phase, during which the skills of the test riders are called for in particular. And only after every necessary improvement – no matter how small – has been documented and implemented, and the test riders themselves are satisfied, is series production given the green light.

BROSE ePOWER

BROSE E-POWER

Nox Hybrid bikes are not only distinguished by their attractive appearance, extreme robustness and outstanding handling, but, above all else, a perfectly integrated drive system that meets the tough demands of mountain biking. With the new Brose Drive S mid-mounted motor and a battery capacity of up to 630 Wh, no ride is too long and no climb too high for the Nox HYBRID bikes.

DWP 27,5"/29

DOUBLE WHEEL PERFORMANCE

Thanks to flip chips on the dropouts, all bikes can be equipped with 27.5" or 29" wheels (Boost standard), providing the ideal basis for a wide application range, extending from long alpine tours to after-work rides on technical trails.

MODERN GEOMETRY FOR PERFECT RIDE CHARACTERISTICS

Long wheelbase, flat steering angle, short chain stays

NEW COLOURS, SURFACES, DECOR

DESIGN EVOLUTION

New shapes, colours, surfaces and decor that nevertheless remain true to the unmistakable Nox design language

CABLE ROUTING

neat and tidy appearance thanks to integrated cable routing

FLEXIBLE TYRE SELECTION

- ▶ Tyre width up to 2.8" (for 27.5"+) with Boost standard
- ▶ Wheel size (27.5" / 29") with flip chip

OPTIMISED MOTOR POSITION

Harmonious solution integrated perfectly into the frame and overall design

QUIET, INTUITIVE HIGH-PERFORMANCE MOTOR

With its high torque and responsiveness (36V, 250W, 3,400g), the Brose Drive S mid-mounted motor ensures powerful yet natural riding pleasure

FULLY INTEGRATED HIGH-PERFORMANCE REPLACEABLE BATTERY

Greater range thanks to the new lithium-ion battery from BMZ (630Wh, URV8, 50 cells). The fully integrated battery has a compact design and can be removed from below.

EQUIPMENT OPTIMISED FOR E-BIKES

All series e-bikes are equipped uncompromisingly to meet the demands posed by challenging terrain

DRIVE UNIT

brose
Competence in Mechatronics

PARTNERS

In close collaboration with the established e-mobility companies, Brose and BMZ, our developers and designers have integrated the powerful battery and the electric motor in the optimum areas of the sophisticated frame geometry. Nox Hybrid bikes are not only distinguished by their attractive appearance, extreme robustness and outstanding handling, but also and above all by a perfectly integrated drive system that meets the tough demands of mountain biking.

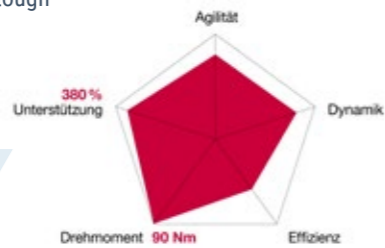

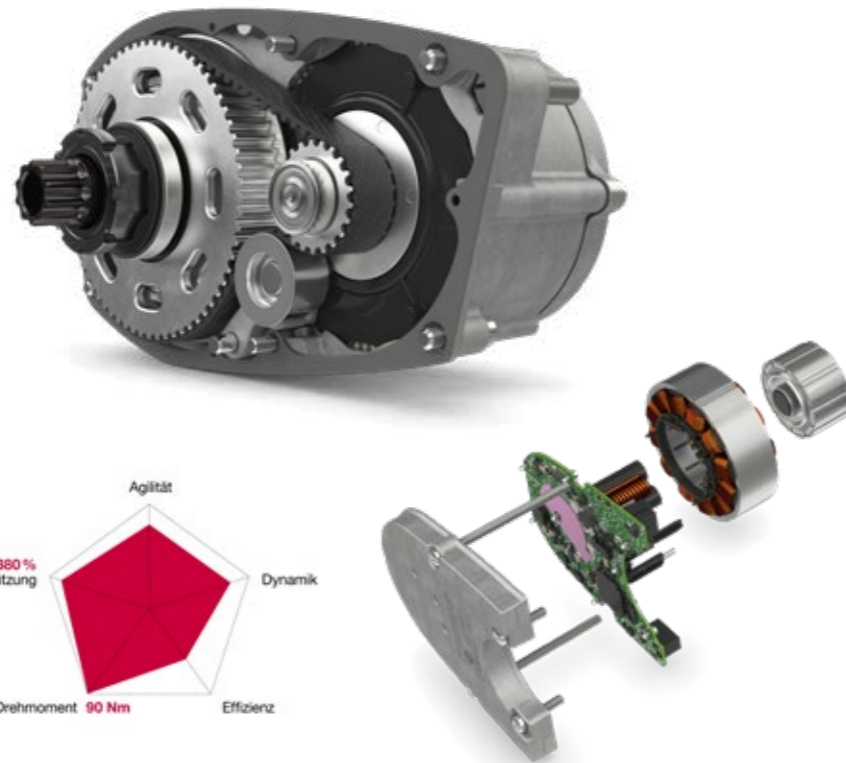

drive
S

PEAK PERFORMERS

E-mountain bikes must offer precise response, particularly on technical and rocky trails. The finely tuned sensors of the Drive S provide the ideal amount of additional power at just the right moment. This results in natural and intuitive riding pleasure and an authentic MTB experience – even in extreme conditions.

QUIET PROPULSION

Whether in the forest or on a mountain pass – every noise from the motor can spoil the enjoyment of nature. Something that the engineers at Brose considered as well. With success! The motor remains virtually silent, even on steep climbs and at high speed!

TECHNICAL DATA

▶ Dimensions	213 x 150 x 128 mm
▶ Weight	3,400 g
▶ Motor type	mid-mounted
▶ Rated voltage	36 V
▶ Continuous rated power	250 W
▶ Pedelec support	up to 25 km/h
▶ Push-assist	up to 6 km/h

BMZ
DRIVE SYSTEMS

BMZ URV8 FOR DEMANDING LOAD SCENARIOS

The URV8 battery has a highly effective mounting mechanism and works reliably even under demanding load scenarios. The URV8's aluminium housing and mounting bracket are robust and resilient. The fully integrated battery has a compact design and can be removed from below. It is built using BMZ Top cells, which have a very high energy density and a service life of up to twelve years. The URV8 has a peak performance of 30A, 630Wh and is available with a rated voltage of 36V. This makes the URV8 a high-performance solution ready for the new generation of e-bike motors.

PERFORMANCE DATA

▶ Energy content	50 lithium-ion cells / 36.0V
▶ Capacity	17.5 Ah
▶ Discharge contact	Blade contact
▶ Lockable	yes
▶ Weight	approx. 3,900 g

THERE'S A REASON
WE DON'T SEE THE
WORLD IN BLACK
AND WHITE.

XC

NOX HYBRID **XC TRAIL** LONG AND LAID-BACK.

You enjoy long, laid-back rides on 29" tyres, but would you also like to ride technical trails with 27.5" wheels on the same bike? Are you tired of wearing yourself out on climbs and not having enough energy left to make it further on your cross-country tours? Would you like to ride a trail e-bike that's equipped to the highest standard but is still affordable?

If your answer to these questions is **YES**, then we have the perfect bike for you: the new Nox HYBRID XC TRAIL – a bike for everyone who wants to push themselves beyond their limits.

DETAILS

- ▶ Wheel sizes 27.5" / 29"
- ▶ Suspension travel (front) 130mm
- ▶ Brose Drive S Alu mid-mounted motor (36V, 250W)
- ▶ BMZ URV8 battery (630Wh)
- ▶ Cross-country-specific components
- ▶ Mounts for kick-stand, panniers, mudguards and water bottle

5.9

NOX HYBRID **ALL-MOUNTAIN 5.9** THROUGH THICK AND THIN.

Looking for an e-mountain bike that's a true all-rounder and can accompany you on all your rides, be it your regular tour or an alpine crossing? Are you tired of wearing yourself out on climbs or being dependent on lifts? Are you looking for a reliable and robust bike with top components at a really fair price?

If your answer to these questions is **YES**, then we have the perfect bike for you: the NOX HYBRID ALL-MOUNTAIN 5.9 with 150mm suspension travel. A bike that goes through thick and thin with you on every ride!

DETAILS

- ▶ Wheel sizes 27.5" / 29"
- ▶ Suspension travel 150mm
- ▶ Brose Drive S Alu mid-mounted motor (36V, 250W)
- ▶ BMZ URV8 battery (630Wh)
- ▶ All-Mountain-specific components
- ▶ Water bottle mounts

7.1

NOX HYBRID **ENDURO 7.1** OVER ROUGH AND ROCK.

Do you like extreme, long rides on single trails and over rough terrain? Do you want to have fun riding both uphill and downhill? Are you tired of having to use a shuttle or a lift several times a day to ride your favourite trails? Are the currently available e-bikes not extreme enough for you? Or maybe you're not a fan of the "mounted battery" design?

If your answer to these questions is **YES**, then we have the perfect bike for you: the NOX HYBRID ENDURO 7.1 with 180mm suspension travel represents an optimum symbiosis between muscle power and electric assistance in extreme conditions – for riders who love cycling and unbridled adventures.

DETAILS

- ▶ Wheel sizes 27.5" / 29"
- ▶ Suspension travel 180mm
- ▶ Brose Drive S Alu mid-mounted motor (36V, 250W)
- ▶ BMZ URV8 battery (630Wh)
- ▶ Enduro-specific components
- ▶ Water bottle mounts
